Stage 01: Pre-admission Preparation

We establish an initial telephone communication with the parents to schedule a meeting to provide an overview on our EEI and providing the parents with all the requirements for registration in case of vacancies.

Stage 02: Gradual Introduction

When the child is registered, communication with the parents shall follow up intensively on a daily basis to convey details of the activities, share pictures of their child with them, and details of the daily care provided to their child in the aim of giving a complete overview of the educational level.

Stage 03: Full integration

We ensure the child is fully integrated into our routine by encouraging the parents on their child's attendance and provide continuous support based on the child's needs.

Stage 04: Review and Feedback

On usual basis, we evaluate the success of the settling-in process and the child's development within their main group (class) on term basis to identify any areas for improvement.
